

Google Meet Hardware

Google Meet hardware is a Chrome OS powered UCC platform intended to be a cost-effective conferencing solution for businesses. The Kit consists of a Chromebox, a Speakermic, a Touchscreen Controller and a Camera.

Icron provides unique extension solutions for Google Meet hardware for both the Hub extension to the tabletop and connectivity for the Speakermic and Touchscreen, as well as the camera.

Hub Extension:

The Raven 3104 Pro has been specifically designed to support the connection to the table for Google Meet Rooms. The Raven 3104 Pro extends USB 3-2-1 up to 100m over field terminatable CAT 6a cable, and integrates a 4-port USB 3 Hub.
